

DOLPHIN MULTIFEED DISPENSERS MANUAL

- › BC6300: reservoir is filled manually from beneath the vanity
- › BC6300TF: includes a top-fill option, so soap can be poured in from above the counter
- › Top-fill tube is a 1.5-inch concertina-style tube that feeds soap down into the reservoir bottle below the vanity
- › Top-fill tube shown on the drawings as an optional extra
- › Installation drawings include dimensions and details to help with designing the installation
- › The Dolphin Strataplate is recommended for the wall mounted soap dispensers. Installing the Strataplate means no access is needed beyond the splashback.
